

Make your own Alien!

As part of our performance of **'Lucy's Race to Space'** we are encouraging our young... and not so young...audience members to bring along their very own homemade alien. Use recycled materials and let your imagination run wild... here are some ideas to get you started and don't forget to bring your finished creation to the concert!

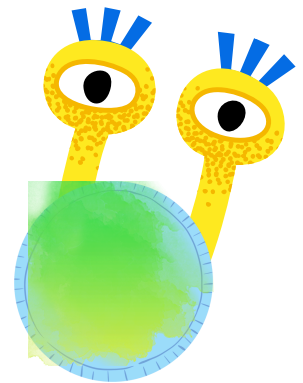

Gather your materials... a paper plate or some card for the base of your alien, some scraps of coloured paper, paint or crayons, a glue stick, collage materials and things to decorate your alien like googly eyes or pompoms

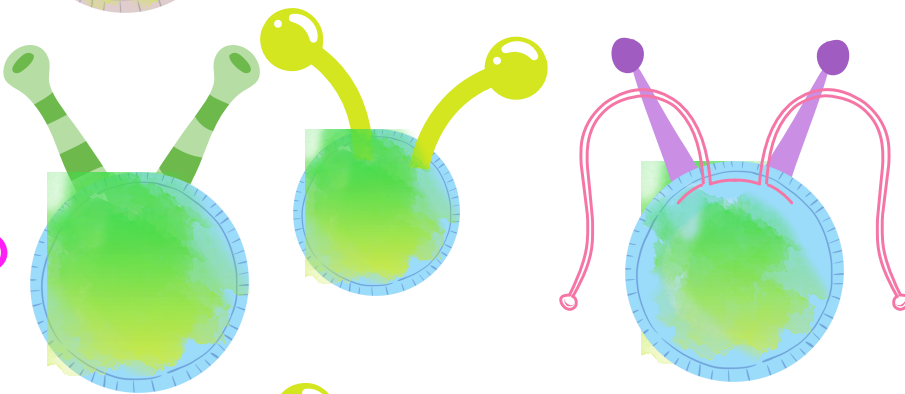

1

Paint or colour in your paper plate or card to make the 'face' of your alien. You could stick on colour paper too. What colour will your alien be? Why have you chosen that colour?

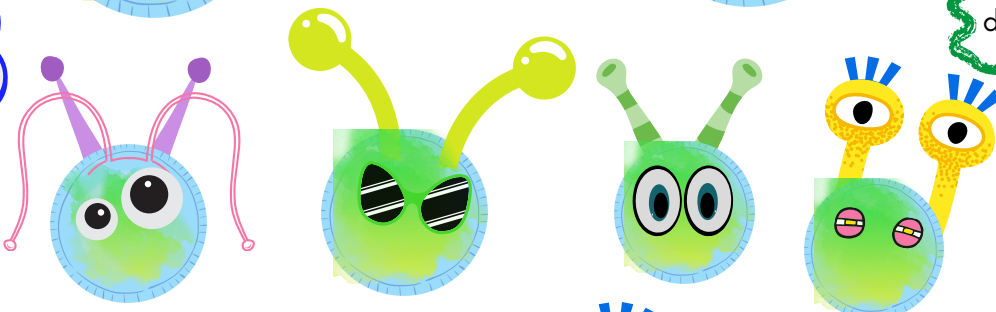

2

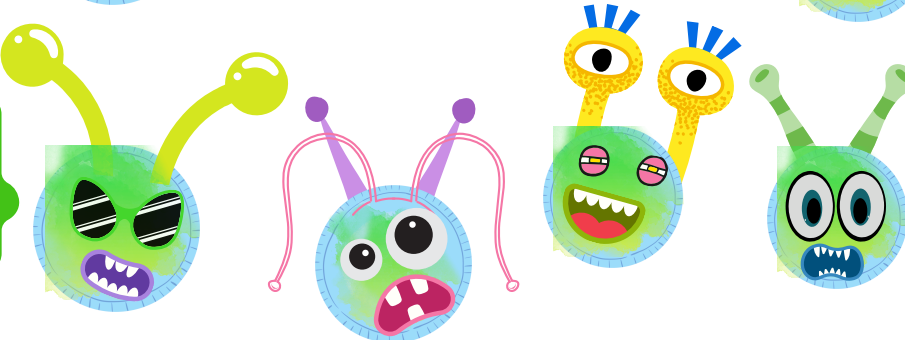

Will your alien have antennae? Cut them out of card, or use pipe cleaners or lolly sticks and pompoms or buttons to decorate them.

3

What about eyes... cut them out of card or stick on googly eyes... what shape will they be. Will they have two eyes, or one, or more?

4

Lastly, a mouth... does your alien have one? are they smiling, do they have teeth, a tongue, or something else?

Ideas page...

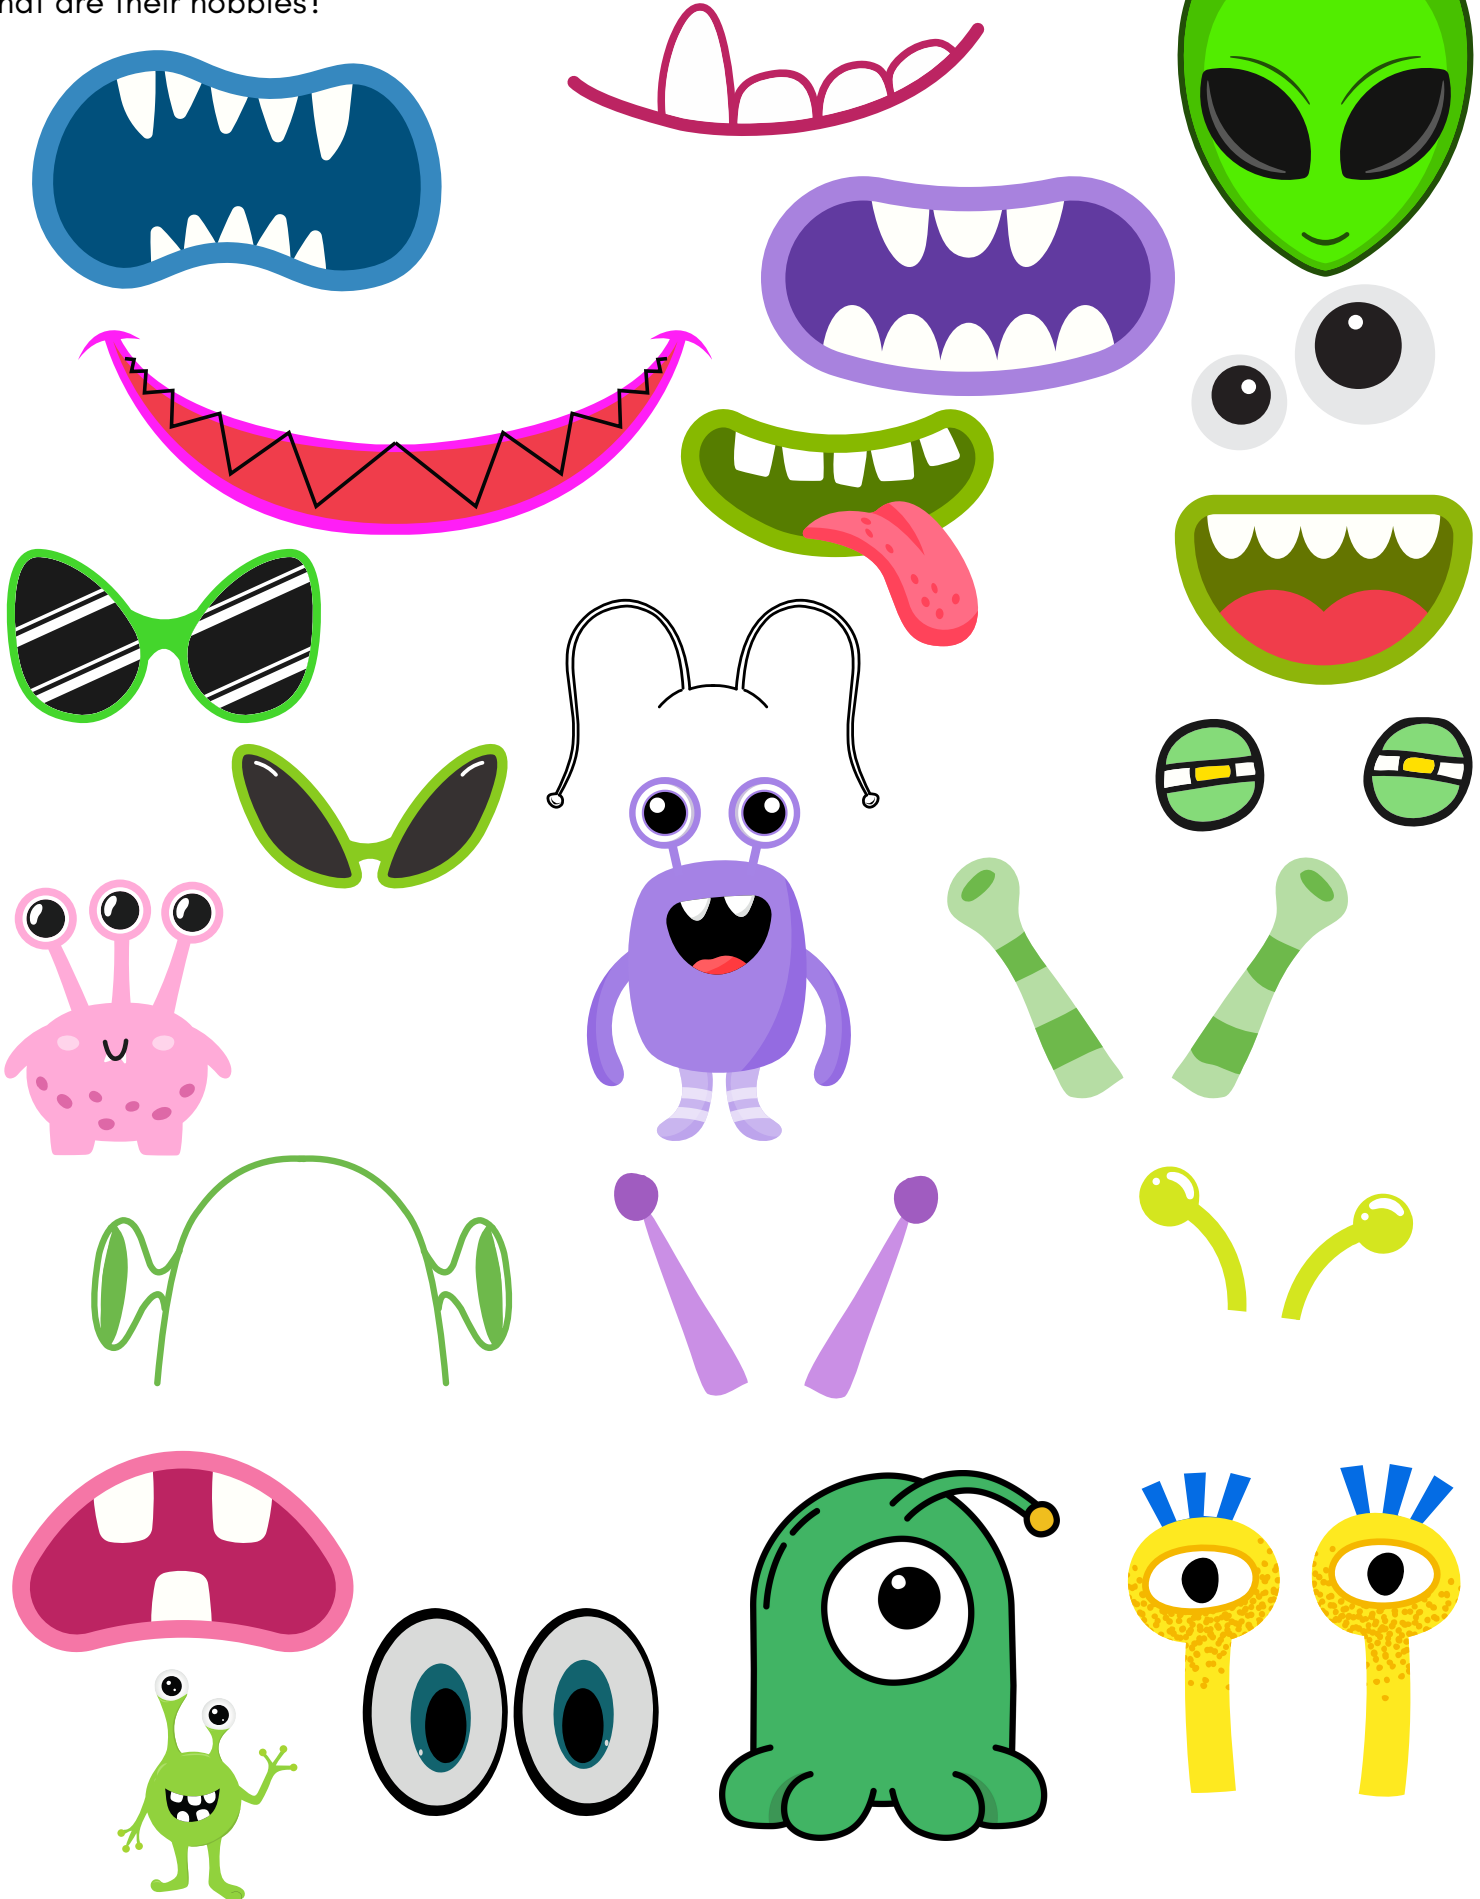

CAMBRIDGE
PHILHARMONIC

What is your alien's name?

What sort of character do they have?

What's their favourite music?

What are their hobbies?

Meet Bob, the Cambridge Philharmonic Alien.
Bob enjoys swimming in the river Cam and
exploring the galaxy.
Bob will be popping up at the concert... see if
you can spot him!
